Dear ICRI and Potential Students,

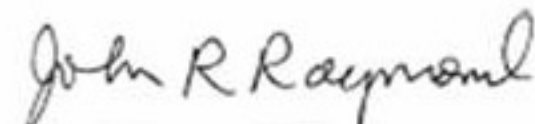

We are very excited about the collaboration between the Institute of Clinical Research India (ICRI) and the Medical University of South Carolina. This collaboration will allow ICRI students to participate in and earn a degree from MUSC's Master of Science of Clinical Research (MSCR) program.

Located in the beautiful historic city of Charleston, the Medical University began operation in 1824, making it one of the oldest centers for medical education in the United States. We take pride in the rich traditions of this institution, while we look forward to building an even brighter future through partnerships such as the one with ICRI.

The Medical University faculty and staff join us in extending an invitation to you to learn more about our MSCR program. If you do, we trust that you will discover that this university provides a supportive environment for students. As educators, we take great pride in the personal and professional accomplishments of our students and graduates. We hope that you will consider ICRI and MUSC further, and we wish you the best of success in your future pursuits.

With best wishes,

Raymond S. Greenberg, MD, PhD
President
Medical University of South Carolina

John R. Raymond, MD
Vice President for Academic Affairs and Provost
Medical University of South Carolina
